

S-158C

The **S-158C** is the latest innovation for the emerging international concrete construction market. Featuring a powerful engine and 4 wheel drive, it offers great maneuverability and outstanding quality for floor placing with a ton of pulling power. The S-158C provides you with a highly simplified, productive, and cost-effective solution for your floor construction needs.

This machine offers quick set-up, comfortable operation and is very easy to use. Because of its size and light-weight, it is easy to transport, suitable for various applications, such as slab-on-deck, slab-on-ground, and parking lot

FEATURES / BENEFITS:

- 1 man Screed Crew
- Screed in any Direction
- 4-Function operation
- Automatic Soft Landing
- Soft Start Vibrator
- Somero Quick gradeset System
- Quick Pass
- Suitable for Various applications including chaired rebar, chaired mesh, heat tubes and ice rinks, etc.

SPECIFICATIONS:

Engine	Honda, 20.5 hp (15.3 kW)
Propulsion	4-Wheels Drive with porporational joystick and valve driving hydraulic motors
Tires	80/100 X 21" (30.48cm) tires with aggressive treads (Standard) 28 x 10-12 ATV tires with aggressive treads (optional)
Overall Length	116 5/8" (2.96m)
Overall Width	100 5/8" (2.56m) total head width 96 3/4" (2.46m) vibrator length 43 7/8" (1.12m) at wheels (Standard Tires)
Overall Height	52 5/8" (1.34m) without masts
Ground Clearance	10.8" (.27m) under frame
Weight	1,450lbs (658kg) w/Screed Head attached
